

ENVIRONMENTAL POLICY OF VERINDPLAST S.r.l.

VERINDPLAST S.r.l. has developed an Environmental Management System in accordance with the UNI EN ISO 14001:2015 standard and It commits itself to:

- give maximum priority to environmental topics, in all decisions connected to its business, products and services;
- implement a business model based on respect and protection of the global ecosystem, minimizing the consumption of energy resources, optimizing the use of materials and training our team on environmental issues;
- invest in technologies with reduced environmental impact;
- research and select equipment and products with reduced energy consumption and environmental impact;
- prevent pollution and comply with current environmental legislation;
- train and inform all levels of staff on environmental issues, involve, on every appropriate occasion, partners, customers, suppliers and all interested parties in general;
- plan and implement the environmental objectives;
- Publicize outside and inside the company all information relating to the environmental policy, environmental performance and set objectives;
- divulge information and guide customers towards products compatible with environmental development, respecting present and future generations;
- apply the best environmental (economically sustainable) techniques available on the market;
- the preliminary evaluation of the environmental impacts connected to the company processes, the internal and external verification activities, and the Management Review are the tools that the organization implements to continuously improve itself.
